

BAGGI® is a company based in Milan (Italy) who has been designing, installing, integrating and maintaining telecommunication systems since 1975.

Initially we were dedicated to the cabling and installation of Time Division voice PABXes for medium and large enterprises; since the brand name **VoiceEvolution**. Due to our success in Italy and abroad, our activity has expanded to other fields, that go beyond ISDN voice transmission and switching.

Our company provides turn-key systems, designed according to the Customer's requirements, installed world-wide, certified according to the local regulations, delivered with the "as-built" documentation and with the possibility of training courses.

Hereafter are listed the offered Products and Services:

- Voice over IP (VoIP) solutions for small and medium enterprises.
- Cabling (either wire or fiber) for any telecom application, e.g. Triple Play services.
- Internet LAN/WAN (hubs, bridges, switches, routers, gatekeepers, gateways)
- Videoconference solutions (either ISDN or IP based)
- Multimedia Classrooms / Control Rooms

- Remote e-learning
- Data Acquisition from sensors in industrial plants (including analog signals and PLCs)
- Electrical Wiring, when needed to complete the delivery.

BAGGI® SERVICE takes care of post-sales support.

The help desk multilingual contacts (e-mail and phone lines) are available for system upgrades, software release changes, consumables delivery, maintenance requests and general consultancy.
